Abstract:

Daily Visit Report is an application to record all the visit reports by the employee which will be reported directly to the unit head. This app is a must-have for anyone working in the field and on sites. Easily log in hours each employee has spent to complete a task will get recorded through this application.

This app will also have the GPS based location service that will help to managers to get the live location of the employee working on the different field or sites.

Proposed System:

This is the basic flow of our proposed system:

Dr. D. Y. Patil Institute of Engineering Management and Research, Akurdi.

Track

Attendance

Applications:

For marketing employees and companies so they can monitor day-to-day activities/visits of their sales team.

The tracker is location based which will use GPS.

Tracking becomes so easy for the employers so that they can focus on right things to help their business growth.

Expenses, billings and total work hours are also monitered by the DVR system.

Novelty:

Unique features of our applications:

1. TODO list
2. Sales Incentives according to the ranking
3. Location based tracker
4. Expenses and bills

Conclusion:

We can finally conclude that using this project we can have greater efficiency in providing the daily visit reports of the employee and a great interface between the unit head and the employees working on sites, thus becoming time saving and error free.
